### **About the Company**

The Company is developing mining operations for gold on its 100%-owned Mon Gold Property, 40 km north of Yellowknife, NWT. Past production extracted 15,000 tonnes of ore to depths of only 15 m below surface, recovering an estimated 15,000 ounces of gold in the 1990’s (NI 43-101, August 2023). There is a discrepancy between the reconciled production grade (30.7 gpt) and the grade reported for royalty and tax purposes (10.02 gpt). The former reconciles tailings grade and recoveries and matches sample grades completed by the Company whereas the latter figure is unsupported. The North Ramp has been reopened and has been extended to within 60 m of the target portion of the vein. The Company plans to extend the ramp to where some high-grade historic holes intersected the vein beneath the previously mined stopes. The plan is to install cross-cuts and raises within the vein to extract and stockpile the vein material on surface. Upon confirmation of the grade and tonnage, a permitted mill will be brought in to process this and ongoing mined material.

The property also hosts an outcropping precious-metals rich VMS showing and has four modeled geophysical targets along strike within felsic tuffs, lithic and lapilli tuffs. There are plans to drill these when it is appropriate.
